How to use an AV System
With a Touch Panel

Waking up the touch panel
Press the touch panel and the system will awaken showing Curtin logo.

Using lectern computer or laptop
Lectern computer use:
1. Press the COMP button on the touch panel.
2. Under Image select ON. This will turn on the projector, please allow 30 seconds for it to power up.
3. Then under Source select PC, this asks for the signal from the lectern computer.

PLEASE NOTE: Make sure there is signal coming from the lectern computer by moving the mouse as the screen does go into sleep mode.

Laptop use:
1. Connect VGA cable and 3.5mm audio cable coming from lectern to the laptop.
2. At this point you will need to make sure the laptop is sending a video signal to the projector. Press the “Fn” key on your laptop and the corresponding Function key. A picture of a screen or the text “CRT/LCD” on the “F” key will indicate the correct key you should press with “Fn”.

Playing a DVD or VHS Tape

<table>
<thead>
<tr>
<th>DVD Use:</th>
<th>VCR Use:</th>

<tbody>
<tr>
<td>5. Press the DVD button</td>
<td>1. Press the VCR button</td>
</tr>
<tr>
<td>6. Press POWER then EJECT. Insert the DVD and close the tray</td>
<td>2. Press POWER then EJECT. Insert the VHS Tape into the tape slot</td>
</tr>
<tr>
<td>7. Now press the play button on the touch panel</td>
<td>3. Now press the play button on the touch panel</td>
</tr>
</tbody>
</table>

Volume Control
PLEASE NOTE: The volume control is applicable to all audio inputs i.e. lectern computer volume, laptop audio volume, DVD volume and VCR volume. This changes the volume level of particular inputs you will need to select the appropriate button first i.e. COMP, DVD, or VCR.

1. Press the VOLUME button at the top of the lectern.
2. Press UP to increase volume or DOWN to decrease volume.
