

This guide is intended for researchers, staff and students from participating institutions to securely access the Internet from Curtin.

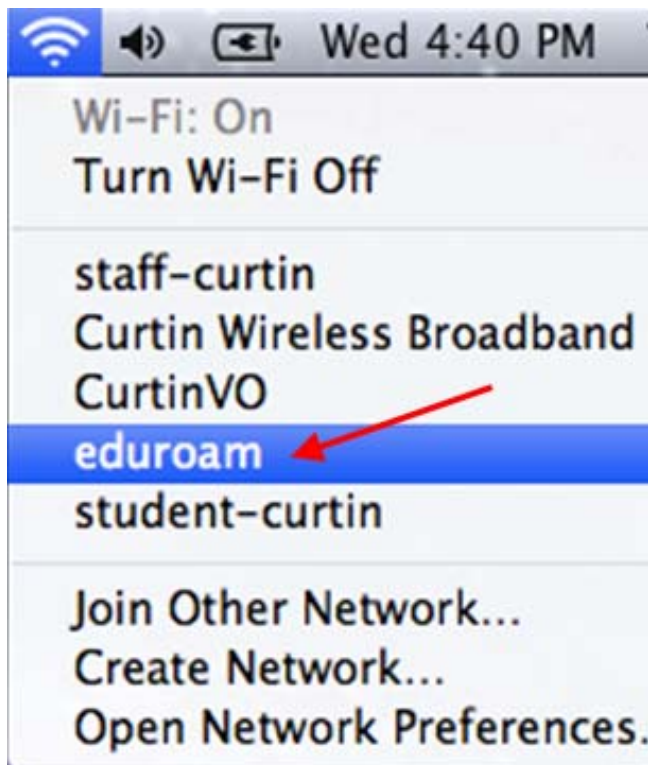

For Mac OSX 10.8, 10.7 and 10.6

The steps involved in setting up eduroam connection in Curtin are:

1. Setup eduroam wireless network
2. Connect to eduroam

Follow the instructions as shown below:

Step 1.

Choose **eduroam** from the available wireless networks.

Step 2.

Enter your Curtin user ID in the **Username:** textbox using the format userid@curtin.edu.au

Enter your OASIS password in the box marked **Password:**

Click the **Remember this network** tick-box

Click the **Join** button

Step 3.

When the **Verify Certificate** appears

Click the **Continue** button.

Step 4.

Enter your **Password** for the Local Account.

Click the **Update Settings** button.

Note: Your local account on the Mac must have Administrator privileges. Otherwise, this screen will remain until authentication occurs on an account with Administrator rights.

Step 5.

The **eduroam** wireless network is now connected as indicated by a ✓
