

How to Setup Curtin Wireless on Windows 8

These instructions are for Curtin Students, Staff and eduroam (www.eduroam.edu.au) users connecting to Curtin's Wireless Network, using a computer with Windows 8 installed.

These instructions have been prepared using Windows 8.1 Enterprise edition.

Screen shots and instructions may vary slightly for different versions of Windows.

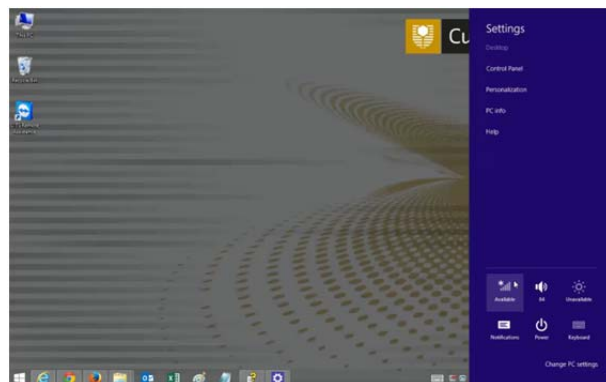

1. Click on "Settings"

Move your mouse to the top right hand corner to bring up Search, Share, Start, Devices and Settings.

2. Click on the wireless Networks icon "Available"

A smaller version of this icon is also available in the task bar in the Desktop.

3. Click on the network you wish to join

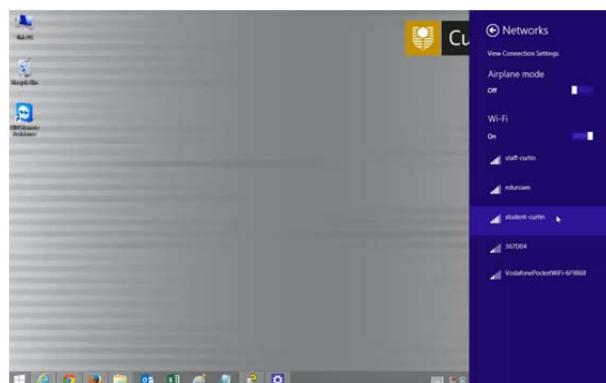

for Students & Postgrads

for Curtin Staff

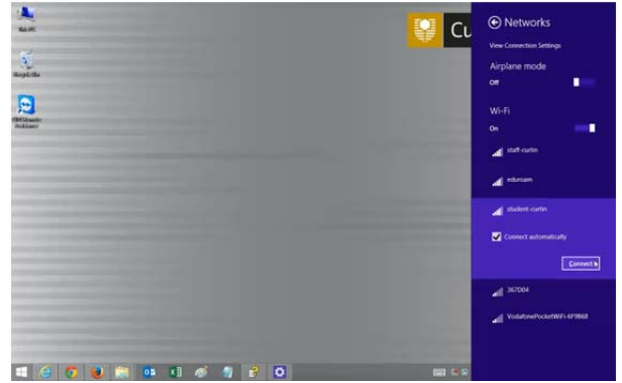

for the education roaming community

How to Setup Curtin Wireless on Windows 8

4. Click on “Connect”

If “Connect automatically” is ticked, and you connect to the network, then if the network is available, Windows will attempt to connect to it automatically.

5. Type in your username and password, and then click “OK”

Make sure “Use my Windows user account” is unticked

Students:
Use your OASIS details

Staff:
Use your Staff OASIS details

eduroam:
Use the credentials from your institution:
<ID>@<institution>.
Curtin users use
<YourID>@curtin.edu.au eg 177358a@curtin.edu.au.

6. If prompted with “Continue connecting?” click “Connect”

This is a warning to make sure you are connecting to the wireless network you are expecting.
