How to use an AV System
With a Touch Panel

Turning on the AV system using the touch panel
If the touch panel is blank, gently press panel to wake it up. Press the panel again to turn on the AV system. The data projector automatically starts. This takes about 30 seconds.

Using lectern computer or laptop
Lectern computer use:
1. If available, the lectern computer is the default source for the data projector when the AV system first starts up.
2. If not already selected, press the PC button on the touch panel.
3. Ensure that the monitor of the lectern computer is also awake by clicking a mouse button.

Laptop use:
1. Connect VGA cable and 3.5mm audio cable coming from lectern to the laptop.
2. If not already selected, press the Laptop button on the touch panel.
3. At this point you will need to make sure the laptop is sending a video signal to the projector. Press the “Fn” key on your laptop and the corresponding Function key. A picture of a screen or the text “CRT/LCD” on the “F” key will indicate the correct key you should press with “Fn”.

Playing a DVD or VHS Tape
1. Press the COMBO button on the touch panel.
2. Insert DVD/VHS tape into the DVD/VCR player. (Press eject for DVD tray)
3. DVD/VHS will automatically play, if not press PLAY on the touch panel.
4. Press MORE to specifically select DVD or VCR as the source and to use menu controls and chapter selection.

Volume Control
1. Press the VOLUME button on the touch panel.
2. Press UP to increase volume or DOWN to decrease volume. A MUTE button is also available.

Turning off the system
1. Press POWER OFF and follow the prompts to turn off the AV system.
