How to Use a MoCoW (Mobile Computer)

Start-up Checklist

1. Is the MoCoW plugged into the power? Is the power switch ON? Plug in network cable to an active port (if required for Internet use).

2. Is the computer powered ON? The power status light should be lit. Otherwise press the power button on the computer.

3. Is the screen powered ON? Press the ON button on front of MoCoW (see below).

4. Is the wireless keyboard turned ON? Slide the switch on the rear of the keyboard.

5. Have you logged into the computer? Use the Visitor login or use your Curtin ID and password.
